

Health Behaviour of School-aged Children study

HBSC England Study

July 2022 newsletter

Your support for the HBSC study has been invaluable. In the coming months, we'd like to keep you updated about the resources we are developing for schools and wider audiences, the status of the analyses and our reporting timetable.

In this newsletter:

- Thank you
- HBSC recorded lesson
- Reporting timetable
- Young people's participation

Thank you!

Our thanks to you and all within your school communities for supporting the delivery of surveys this year. We very much appreciate the time you have given to HBSC, particularly given the amount of Covid absences and catch up work going on with students.

We are thrilled to have exceeded our target participant number across all age groups and look forward to sharing the findings with you.

Spring 2023

HBSC recorded lesson

We've been developing a recorded lesson for students in KS3 and KS4. The lesson – which will be hosted from the end of August on our website – uses HBSC findings and methods and shows how school curriculum content applies to live research.

The main connection points for KS3 and KS4 are with Working Scientifically, Working Mathematically and Statistics.

The recording is 31 minutes long, with opportunities to pause for discussion/extension activities. For example, we present findings on electronic media use, inviting students to discuss their response to the figures, the gender differences and predict the impact of Covid.

We are writing a teachers' guide which we will share with you over the summer, ready for September 2022.

Reporting timetable

As schools close for summer, we are completing our data collection and are busy coding the remaining paper questionnaires. We'll submit our full dataset to the international Data Management Centre in August, then they'll have the mammoth task of cleaning and collating all datasets from HBSC's 49 participating countries!

We are hoping to release snapshot findings of the international report starting from the end of 2022. Our HBSC England study report will be ready in Spring 2023.

Meanwhile, our 2018 dataset becomes open access in November 2022 – if you are interested in using this dataset, please get in touch and let us help you navigate the many (hundreds!) of variables.

Young people's participation

THE YOUTH PPI CAFE

And lastly, we couldn't have delivered our study and resources without the insights and input from the wonderful SPFT Youth PPI Café.

You can find out more about their work here: <https://linktr.ee/YouthPPI>; <https://www.instagram.com/theyouthppicafe/?hl=en>; <https://twitter.com/cafepi>
